Office Action Summary	Application No. 10/599,528	Applicant(s) DELANDSHEER, GEERT	
	Examiner Jill Gray	Art Unit 1782	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 August 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 25, 2010 has been entered.
2. Pursuant to the entry of the amendment of August 25, 2010, the status of the claims is as follows: claims 1-11 and 16-24 are pending. Claims 12-15 are cancelled. Claims 1, 8, 10, 16, 18, and 19 have been amended.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1-11 and 16-24 are rejected under 35 U.S.C. 102(b) and (e) as being anticipated by PCT Patent Publication WO 96/27039 and US 2007/0010154 (hereinafter referred to collectively as "Claeys"), for reasons of record.

Regarding Independent claims 1 and 16

Claeys discloses strengthening material suitable for reinforcement in composites and laminates produced therewith, said strengthening material comprising at least one singular thickness-providing layer in the form of a knit of glass fiber, and at least one singular strengthening layer connected to the singular thickness providing layer. See abstracts of '039 and '154. In addition, Claeys discloses that the layers are fastened

Art Unit: 1782

together by a polyester thread. See '154 [0018] and '039, page 4, line 15. The examiner equates the polyester thread with the present claimed monofilament. In addition, Claey's discloses the formation of laminates. Note [0018] and [0024]-[0025]. The requirement for and "at least one monofilament" does not distinguish the knit glass fibers of Claey's. Knit glass monofilaments are fully embraced by the prior art teachings, note Example 1, which teaches a knit of glass fiber.

Accordingly, Claey's anticipates the invention of present claims 1 and 16.

Regarding dependent claims 2-11 and 17-34

Regarding claims 2 and 18, Claey's discloses a polyester thread. See '154 [0018] and '039, page 4, line 15.

Regarding claims 3-4, and 20, Claey's discloses a thickness of 1-10 mm. See '154 [0007] and '039, page 2, lines 10-11.

Regarding claims 5-6, 9, and 21-23, Claey's discloses a weight of 200 g/m². See [0023].

Regarding claims 7 and 24, Claey's discloses a strengthening layer that can be glass fibers. See [0024].

Regarding claims 8, 10, and 19, Claey's discloses that the strengthening layer can be of the type contemplated by applicants, such as membranes or non-wovens and is connected to the thickness layer by means such as sewing or knitting.. See [0016] and [0017].

Art Unit: 1782

Regarding claims 11, and 17, Claeys discloses materials comprising two strengthening layers and one thickness providing layer sandwiched between these two layers. See [0023] and [0024].

Examiner's conclusion

The teaching of Claeys anticipates the invention as claimed in present claims 1-11 and 16-24.

Response to Arguments

5. Applicant's arguments filed August 25, 2010 have been fully considered but they are not persuasive.

Applicants argue that Claeys does not teach or suggest a strengthening material that includes at least one singular thickness providing layer in the form of a knit formed of at least one monofilament and a member selected from glass filaments, glass yarns and combinations thereof.

In this regard, it is noted in the examples of Claeys that he forms his strengthening material from a knit of glass fibers. This teaching anticipates the present claimed invention.

No claims are allowed.
